

## Ventyx Asset Suite Archive Datasheet

DataGlance, Inc. in partnership with Ventyx provides pre-build Archiving solution for Asset Suite (both Asset Suite/PassPort and EMPAC) using DataGlance Information Lifecycle Management product, ArcPlus.

A Key feature of DataGlance solution is the pre-build Relation for Business Entity and its dependencies to support Archiving. A Business Entity Relation provides the complete relation between tables that should be archived as a single unit.

### ◆ Benefits

- ◆ Improve Application Performance
- ◆ Manage Database Growth
- ◆ Reduce Cost by moving “inactive” data to less expensive storage
- ◆ Reduce Application Upgrade/Migration Cost
- ◆ Improve Operational Efficiency
- ◆ Implement an effective Information Lifecycle Management solution for Ventyx Asset Suite
- ◆ Single Platform to support Enterprise Archiving solution
- ◆ Implement Archive solution for any third party and home grown Application
- ◆ Cost effective, Easy to install and configure

### ◆ Key Features

- ◆ Metadata based code free implementation
- ◆ Pre-Build Business Entity Relation
- ◆ Custom define Business Rules and Policies to Archive Data
- ◆ Easy Access to Archived Data
- ◆ Combine Archive and Production Data into a single “Read Only” view
- ◆ Archive data across Database Type and Platform
- ◆ Maintain Data Integrity
- ◆ Built-in Data Validation and Auditing
- ◆ Leverage native Application logic
- ◆ Partial or Complete Restore capability
- ◆ Leverage Pre-Build Relation for Data Subsetting, Data Masking, and Data Validation
- ◆ Easy Upgrade for new Ventyx Product Release
