## DevonWay Announces Project of the Year Awards at Continuous Improvement Conference

**DataGlance wins the 2015 Commercial Project of the Year Award for its Electronic Work Package project at Exelon; the University of Utah Nuclear Engineering Program wins the Education & Research award for its Track & Trace project at its research nuclear facility.**

San Francisco, CA – Thursday, March 26th, 2015. DevonWay® Inc., a leading provider of operational intelligence software to high-reliability organizations, announced the winners of its Project of the Year competition for innovation and sustainable excellence at the Continuous Improvement Conference (Ci7) in San Diego. The 2015 winner for a Commercial Project went to the Electronic Work Package (eWP) Project, a collaboration between DataGlance, Inc. and Exelon Corporation. In the Education & Research category of the competition, the University of Utah's Nuclear Engineering Program (UNEP) won for its Track and Trace software, which manages incidents and corrective actions.

Regarding the 2015 nominees, DevonWay President and CEO Rob Trounce said, "The Project of the Year event was a highlight at Ci7 and an opportunity to see the conference theme of "Achieving Cost-Effective Excellence" in action. We were pleased by the quality of each of the projects showcased and congratulate DataGlance and UNEP for winning the Project of the Year Award."

Accepting the Commercial Award for DataGlance and Exelon, Ashok Shetty, President and CEO of DataGlance, said, "We're pleased to be recognized for solving real business problems that actually drive operational improvement and help reduce cost." Mr. Shetty continued, "On July 29, 2014, Exelon's Clinton Station personnel completed the first US commercial nuclear work package that was planned, executed and closed out in a completely digital format using our mobile platform."

Accepting the Education & Research Project of the Year Award, Tatjana Jevremovic, PhD, Professor and Director of the University of Utah Nuclear Engineering Program said, "Our strategy to establish and operate a nuclear safety culture at our research nuclear facility includes training students in an environment that mirrors nuclear power plant operation." Regarding their process she continued, "To advance the science behind continuous improvement, we collaborated with DevonWay to develop Track & Trace, an intelligent action tracking solution for initiating, reviewing, and processing corrective actions."

The award proceedings concluded as Chris Moustakas, DevonWay's Executive Vice President and Chief Operating Officer stated, "DevonWay appreciates the opportunity to work with our collaboration partners in creating solutions to solve complex business problems, and automate and improve core business processes. We congratulate DataGlance and UNEP as well as all Project of the Year teams who attended Ci7 and showcased their innovative and valuable projects. We are all united by one goal: the need to operate safely, effectively, and efficiently in challenging, many times highly regulated environments."

#### About DevonWay, Inc.

DevonWay® is the premier provider of on-demand Intelligent Enterprise Solutions that help new and existing customers improve performance, optimize business processes, and guide change management activities at high reliability organizations. DevonWay's applications are highly configurable, easy-to-use, quick to deploy, and built to interoperate with popular enterprise systems of record. DevonWay provides the fastest path to improve mission critical operations while delivering regulatory compliance and improved quality and safety. Headquartered in San Francisco, with solution centers in Portland, Oregon and Salt Lake City, Utah and regional support offices nationwide, DevonWay is equipped to meet your needs. For more information, call 1.888.DEVONWAY or visit [www.devonway.com](http://www.devonway.com).

#### About DataGlance

In operation since 2001, DataGlance, Inc. provides high quality, mission critical solutions for:

- generating and managing complex work flows and documents (electronic Work Packages and electronic Procedures)
- combining non-integrated data into single consolidated work package print documents
- generating documents with data driven content for Contracts, Purchase Orders and Requests for Quotes
- managing complex archiving and interface solutions, and
- supporting real time large scale data migrations and data conversions typically used for legacy system shifts and EAM upgrades.

DataGlance products and solutions are used extensively in Utility and Asset Management applications where companies rely on DataGlance for critical business solutions.

#### About the University of Utah Nuclear Engineering Program (UNEP)

The Nuclear Engineering Program (UNEP) follows the University of Utah's mission to provide excellence and equal opportunity in the areas of education, research, and public service. The UNEP is nestled within the Department of Civil & Environmental Engineering of the University, but maintains its own administrative office where UNEP admissions, graduate student records and other program business are processed. The UNEP is an independent program that draws students from a wide variety of academic backgrounds and utilizes resources and expertise from the engineering facility. The University of Utah's Research & Test reactor is one of 33 in the country.
