

# eCollaborate

DataGlance eKnowledge solution for remote work support and knowledge capture via Merge and Augmented Reality

## How are you using limited expert knowledge?

Do you have an initiative to broadly share, collect, and store your organization's expert knowledge?

DataGlance's eCollaborate solution brings your experts to any connected location via merged and augmented reality and then captures those interactions for future use.

## eCollaborate

eCollaborate provides real-time collaboration and knowledge capture using advanced merged and augmented reality technologies; expanding the reach of your experts to anywhere in the connected world and saving their insights for the next generation of workers.

DATAGLANCE™

# How are you capturing the knowledge of your departing workforce?

DataGlance's eCollaborate solution captures the merged and augmented reality video, audio, image, text, and whiteboarding interactions between your workers; saving that knowledge for use by your next generation workforce.

## eCollaborate Standard Features

- Enables experts to guide field personnel using merged and augmented reality video
- Provides for *video, audio, image, text, and whiteboarding* communications and collaborations via internal Wi-Fi
- Supports both connected and disconnected mode using Live and Recorded video
- Captures interactions to build your knowledge warehouse for future use
- Supports both local and hosted solution environments

DATA GLANCE™

## eCollaborate Improves Work Safety, Quality, Efficiency and Knowledge Capture

- Allows remote condition/activity verification; saving time and removing workers from jobsite hazards
- Supports field personnel remotely; better utilizing expert knowledge across multiple jobsites
- Enables access of retired workforce expertise remotely
- Builds a knowledge warehouse for future reference and training
