

eMedia

DataGlance eKnowledge solution for media management supports knowledge collection, storage, and retrieval when and where needed

**Need an
Enterprise
solution to
manage your
media assets?**

Do you have an initiative to collect, store, and share your media assets?

DataGlance's eMedia solution stores and organizes inherent organizational knowledge – *captured in video, audio, and image files* – and structures retrieval to ensure this information is *known* to be available when needed.

eMedia

eMedia manages a structured multimedia library; associating media with specific work activities and assets thereby capturing inherent organizational knowledge and ensuring its availability when and where needed.
